Claims 1-2, 9-12, 19-20, 22-23, 30-31 are pending.

### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance. The prior art of record does not teach nor reasonably suggest a micro-fabricated chip, or a suspension for a disk drive having such micro-fabricated chip, such that the micro-fabricated chip includes a stationary structure to a load beam; a movable structure attached to the stationary structure, the movable structure including a gimbal structure contacting the stationary structure, a microactuator structure attached to the gimbal structure and the stationary structure, such that the microactuator structure is configured to move the gimbal structure and attached slider in pitch and roll directions with respect to the stationary structure.

Applicants' remarks clearly point out how the amendments to the claims overcome Boutaghou and the prior art as a whole as well, since it is the actual structure of the microactuator that is configured to move the gimbal and associated slider in pitch and roll directions. The prior art microactuators in general only are configured to move in one planar direction, i.e., either parallel to the disk plane or vertically in the perpendicular direction of the disk plane, and not in either and/or both pitch and roll directions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
